In the communication process, the sender firstly thinks about the message he/she wants to deliver to the receiver. This is known as encoding. In encoding, the sender delivers the message clearly and simply by eliminating all sources of confusion. To convey the message, the sender chooses the right medium. When the message is delivered, the receiver starts the process of decoding the message. The receiver receives the message and interprets it. At the end, the receiver gives his/her feedback to the sender.
